

## **Latest situation of COVID-19 (as of 28 February 2022)**

34466 cases tested positive for SARS-CoV-2 virus were reported in Hong Kong on 28 February 2022.

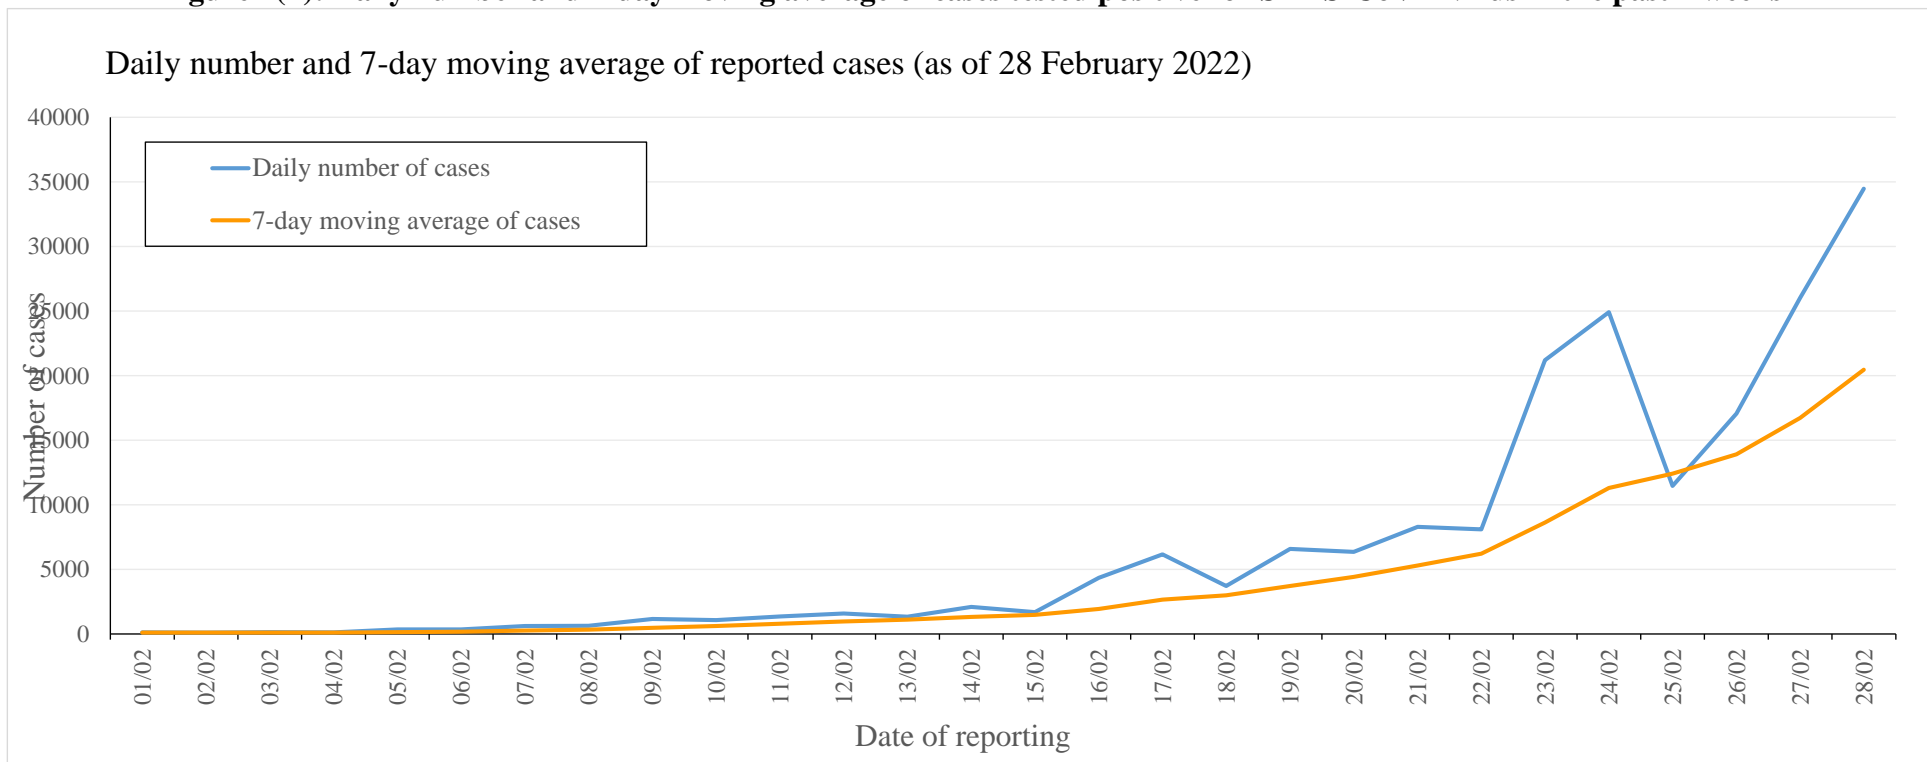

In the recent 7-day period from 22 to 28 February 2022, an average of 20462.3 cases were reported per day, as compared with 5312.9 cases per day reported in the previous 7-day period from 15 to 21 February 2022 (Figure 1).

**Figure 1(i): Daily number and 7-day moving average of cases tested positive for SARS-CoV-2 virus**

Note: Re-positive cases are excluded in Figure 1(i).

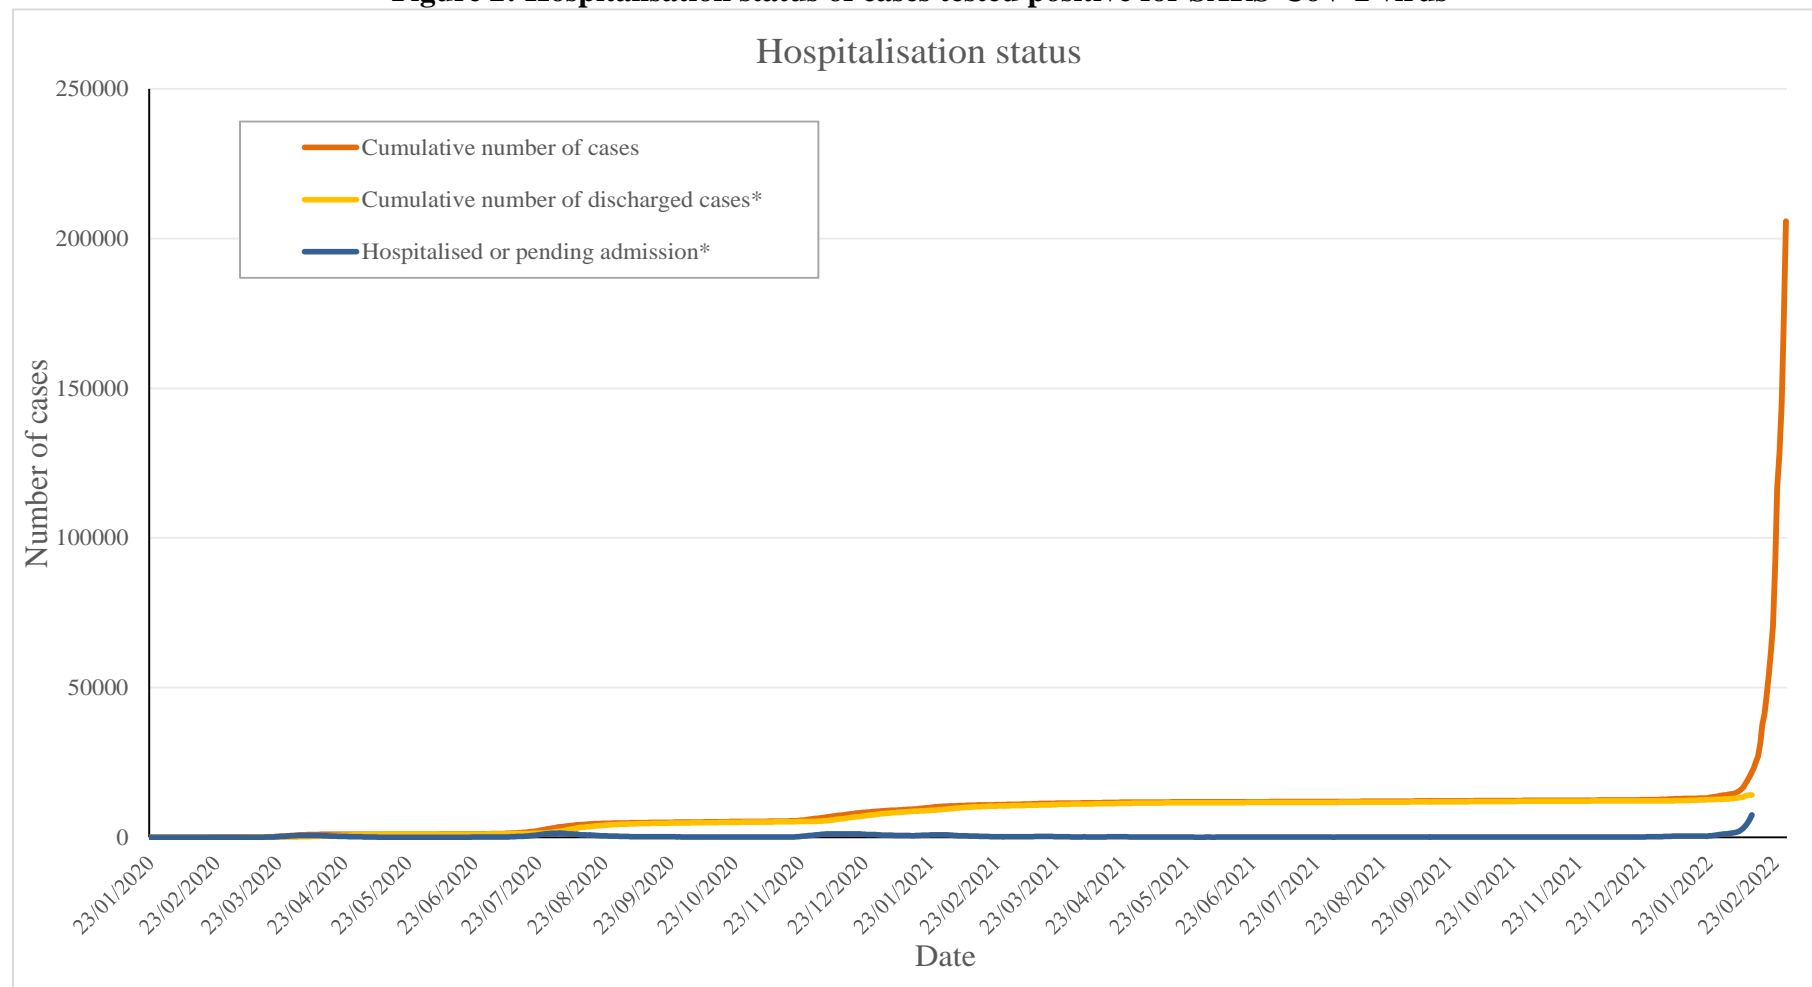

**Figure 1(ii): Daily number and 7-day moving average of cases tested positive for SARS-CoV-2 virus in the past 4 weeks**

Note: Re-positive cases are excluded in Figure 1(ii).

Since 31 December 2019, the Centre for Health Protection (CHP) of the Department of Health has recorded a total of 205780 cases tested positive for SARS-CoV-2 virus. Among these cases, 744 were fatal cases (Figure 2).

**Figure 2: Hospitalisation status of cases tested positive for SARS-CoV-2 virus**

\*The Hospital Authority is still preparing information of the hospitalisation status of reported cases.

Note:

1. 744 cases were fatal cases.
2. With effect from 26 February 2022, the review procedure by DH's Public Health Laboratory Services Branch (PHLSB) on the samples that tested preliminarily positive by testing contractors would be dispensed. Positive cases detected in nucleic acid tests by testing contractors were directly deemed as confirmed cases. Under this arrangement, cases that were originally pending PHLSB's review were treated as cases that tested positive.

Further analysis of these cases could be referred to the tables and figures below. Details of cases reported on or before 6 February 2022 are available at the COVID-19 thematic website ([https://www.chp.gov.hk/files/xls/previous\\_cases\\_covid19\\_en.xlsx](https://www.chp.gov.hk/files/xls/previous_cases_covid19_en.xlsx)). Five cases were deleted on 3 September 2021 (<https://www.info.gov.hk/gia/general/202109/03/P2021090300392.htm>). One case was deleted on 29 January 2022 (<https://www.info.gov.hk/gia/general/202201/29/P2022012900846.htm>).

Table 1 shows the classification of cases reported since 31 December 2021.

**Table 1: Number of cases tested positive for SARS-CoV-2 virus by classification**

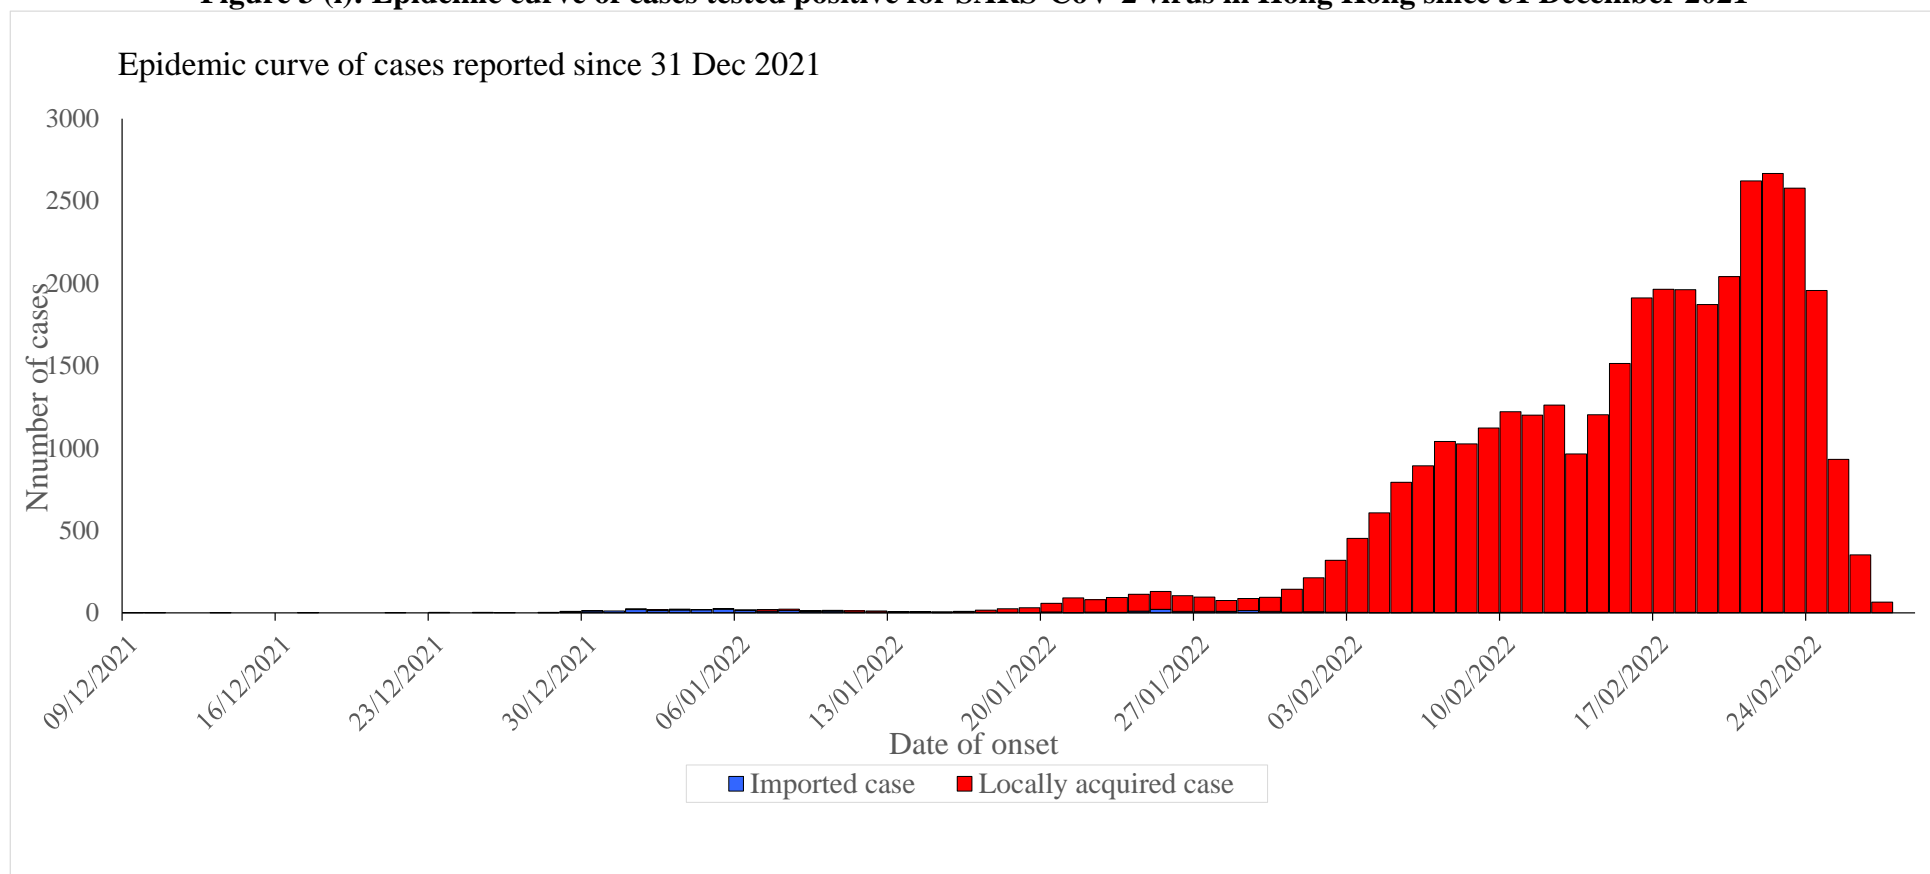

| <b>Reporting period</b> | <b>Imported case</b> | <b>Locally acquired case</b> | <b>Period total</b> |
|-------------------------|----------------------|------------------------------|---------------------|
| Since 31/12/2021        | 754 (0.4%)           | 192395 (99.6%)               | 193149 (100.0%)     |
| 1/2/2022 - 7/2/2022     | 79 (4.3%)            | 1776 (95.7%)                 | 1855 (100.0%)       |
| 8/2/2022 - 14/2/2022    | 44 (0.5%)            | 9251 (99.5%)                 | 9295 (100.0%)       |
| 15/2/2022 - 21/2/2022   | 55 (0.1%)            | 37135 (99.9%)                | 37190 (100.0%)      |
| 22/2/2022 - 28/2/2022   | 38 (0.0%)            | 143198 (100.0%)              | 143236 (100.0%)     |

Among 192395 locally acquired cases since 31 December 2021, 67.7% were known to have been fully vaccinated#.

(# refer to people who have completed the full course of vaccination according to the relevant vaccine developers or pharmaceutical companies)

Figure 3 (i) shows the epidemic curve of cases tested positive for SARS-CoV-2 virus reported since 31 December 2021.

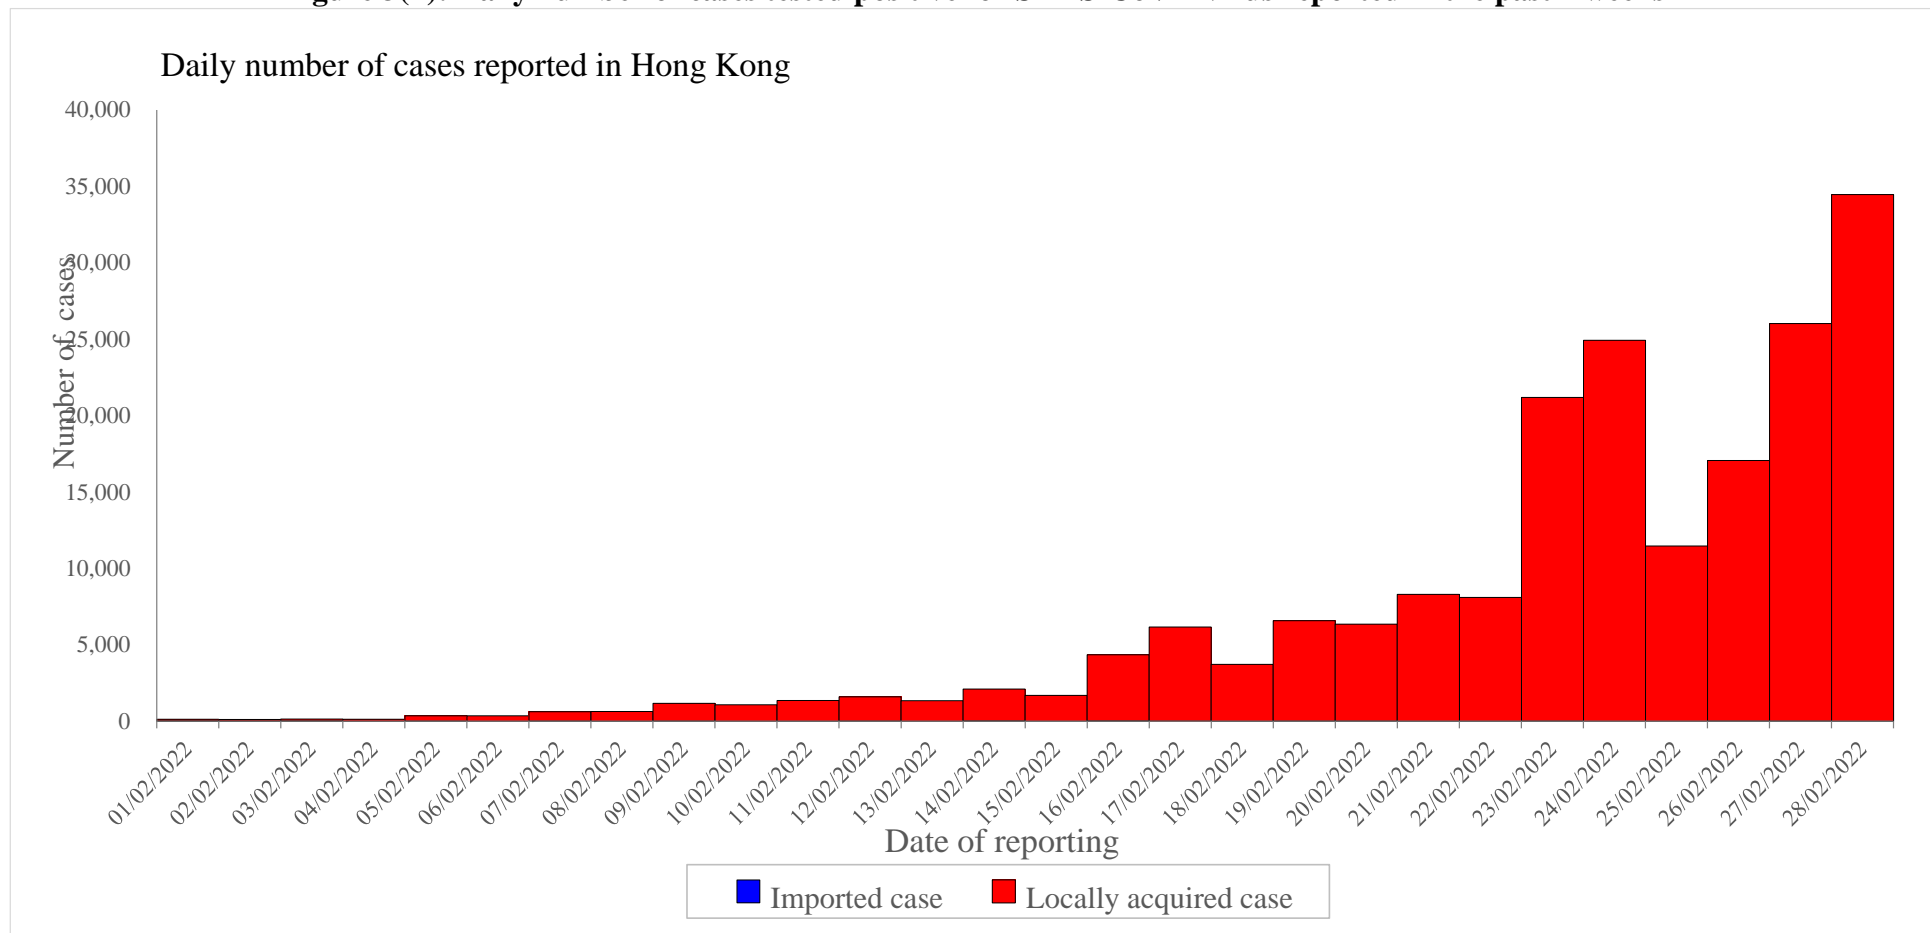

**Figure 3 (i): Epidemic curve of cases tested positive for SARS-CoV-2 virus in Hong Kong since 31 December 2021**

Note:

1. The classification and case status may be subject to changes when there is new information available.
2. Asymptomatic and re-positive cases as well as cases pending investigation are excluded in Figure 3(i).

**Figure 3(ii): Daily number of cases tested positive for SARS-CoV-2 virus reported in the past 4 weeks**

Note: Re-positive cases are excluded in Figure 3(ii).

In the past four weeks, the following large clusters with new cases were reported in Hong Kong (Table 2).

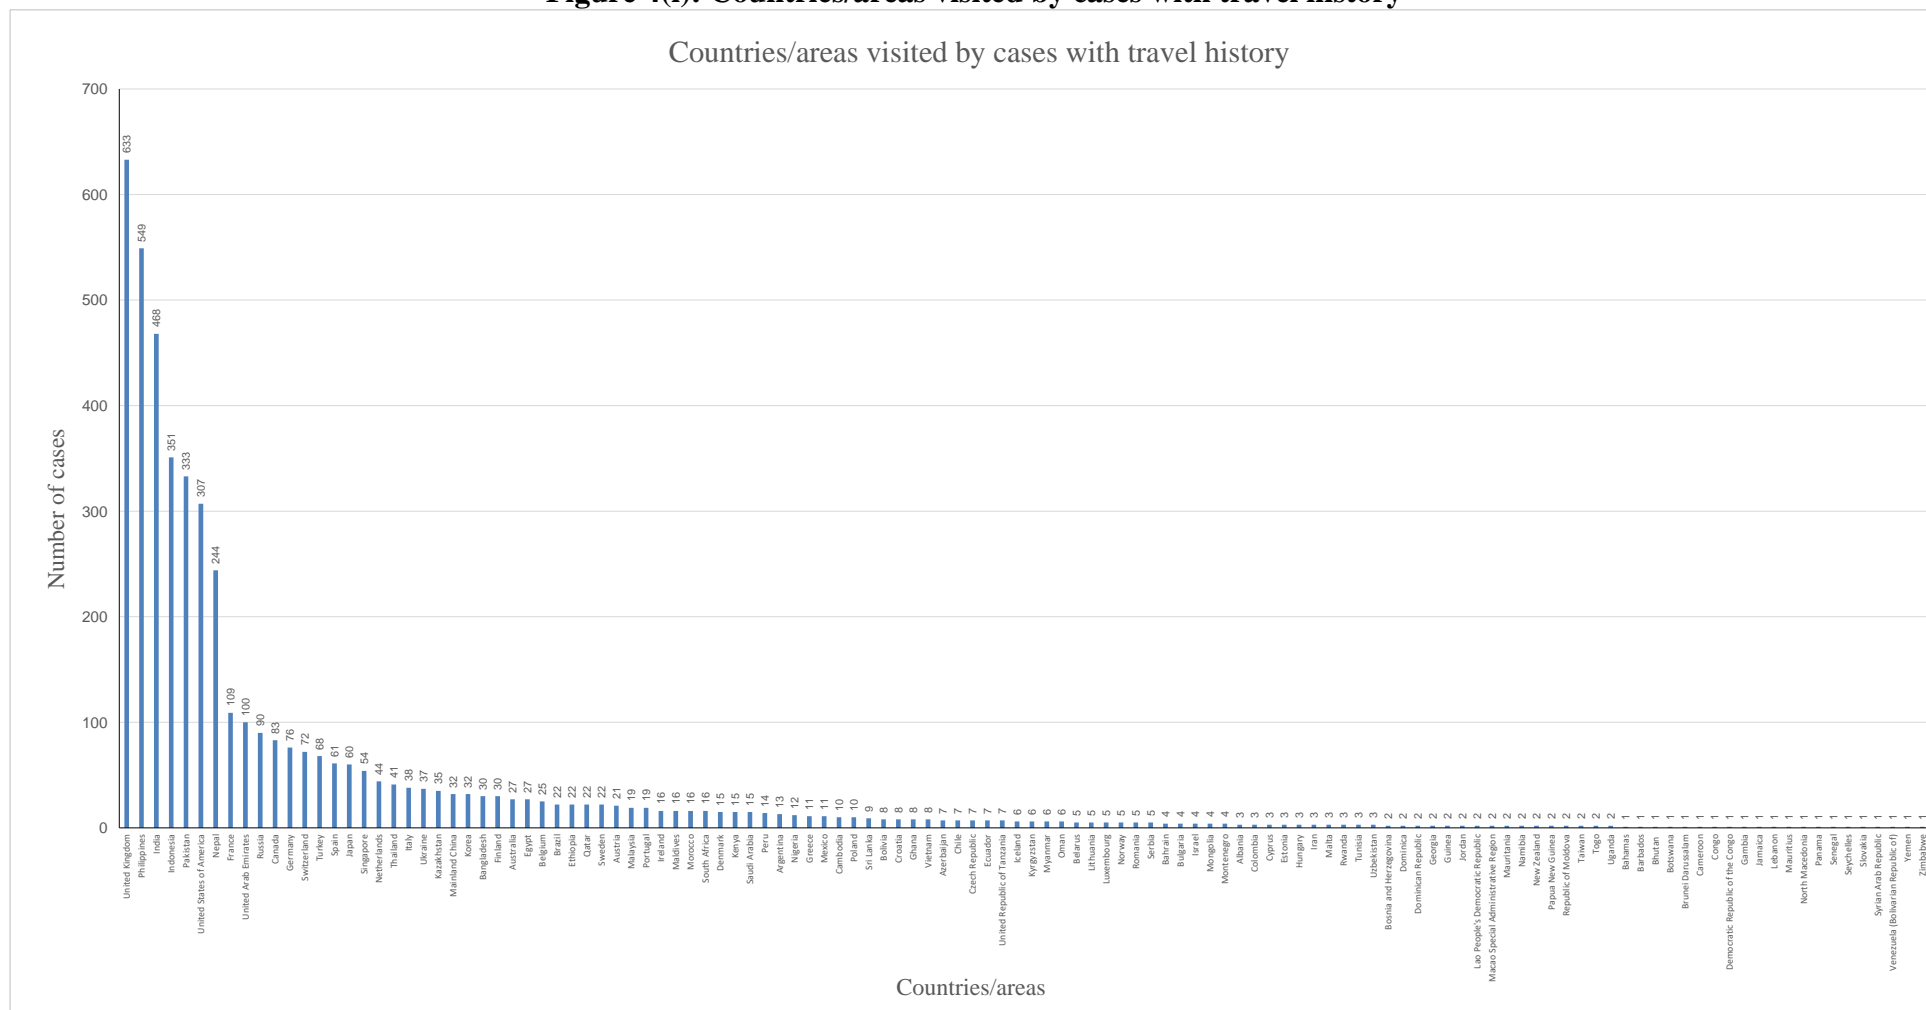

**Table 2: Large clusters (10 or more)\* with newly tested positive cases reported in the past 4 weeks**

| <b>Cluster</b>  | <b>No. of new cases</b> | <b>Total no. of cases</b> |
|---|-------------------------|---------------------------|
| Silka Seaview Hotel Hong Kong (12th floor)/<br>Tung Moon House/ Yat Kwai House related<br>cluster | 0                       | 847                       |
| Hamster-related cluster   | 0                       | 88                        |
| Work related cluster at Yuen Long Plaza   | 0                       | 51                        |
| Sham Shui Po church-related cluster   | 0                       | 36                        |

\*Including cases with epidemiological linkage

Figure 4(i) shows the countries/areas visited by the cases with travel history outside Hong Kong during the incubation period.

**Figure 4(i): Countries/areas visited by cases with travel history**

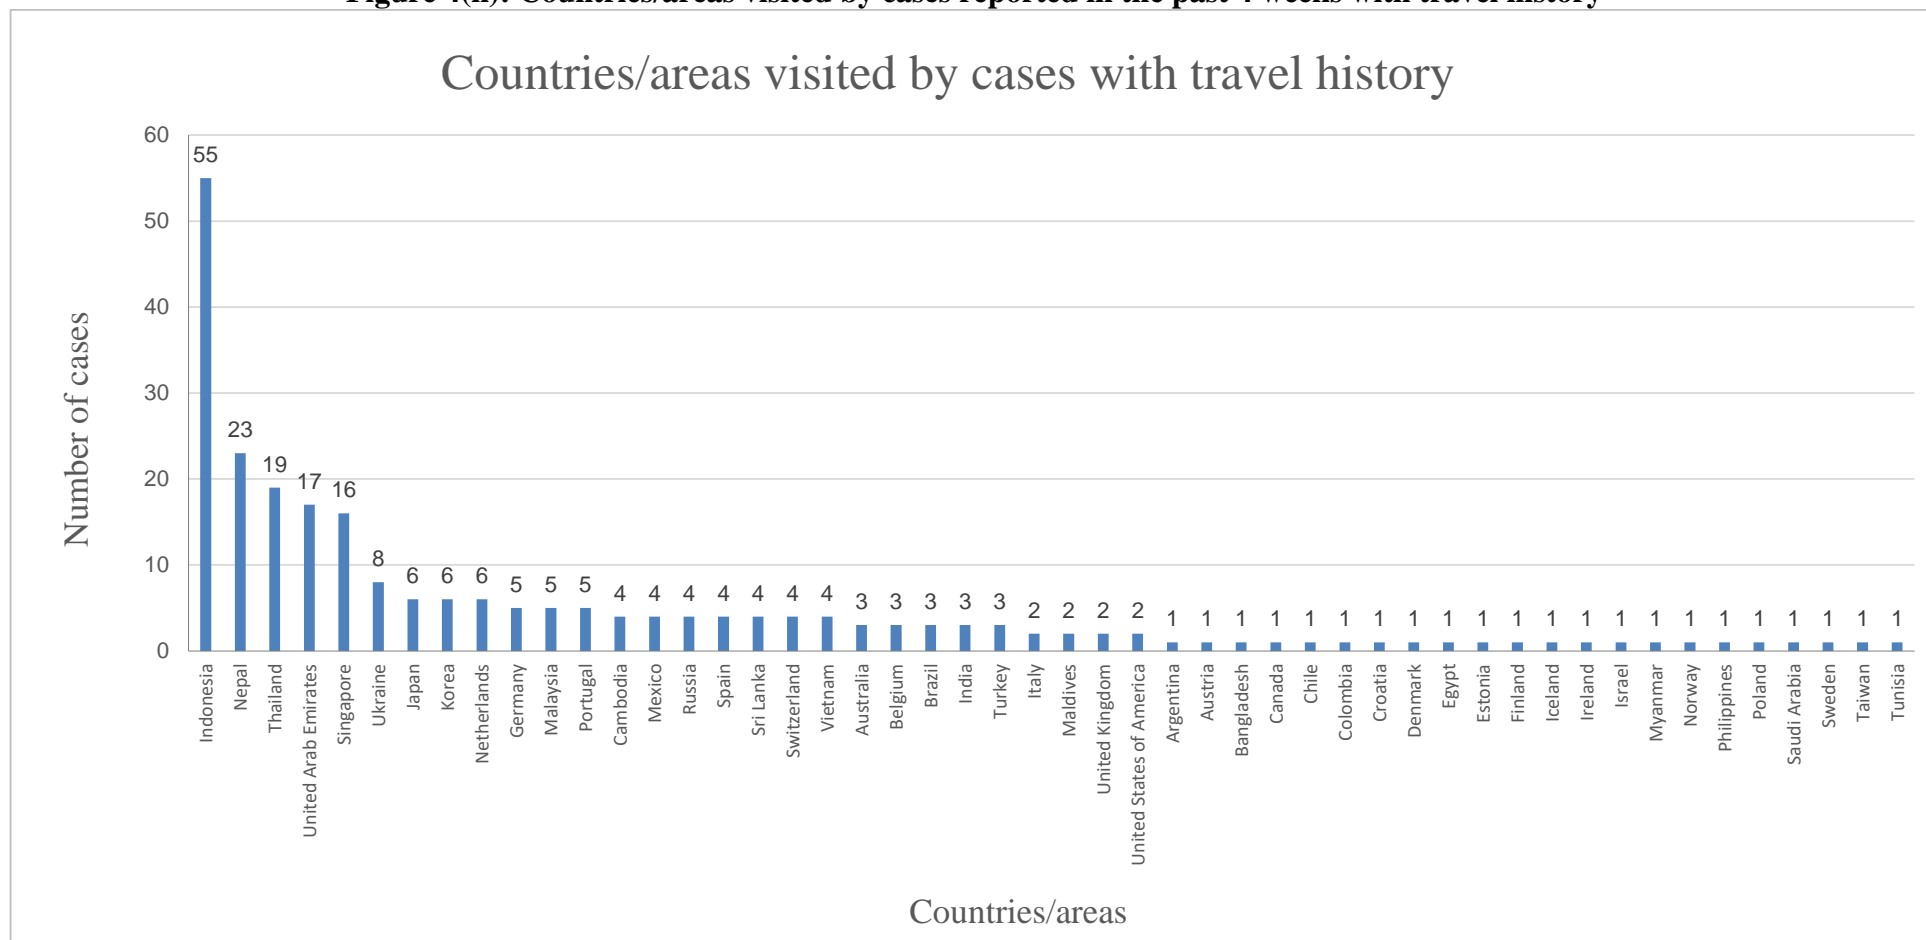

Note:

1. Some cases had visited more than one country/area.
2. Re-positive cases are excluded in Figure 4(i).

Figure 4(ii) shows the countries/areas visited by the cases reported in the past 4 weeks with travel history outside Hong Kong during the incubation period.

**Figure 4(ii): Countries/areas visited by cases reported in the past 4 weeks with travel history**

Note:

1. Some cases had visited more than one country/area.
2. Re-positive cases are excluded in Figure 4(ii).

Table 3 shows the mode of detection of cases tested positive for SARS-CoV-2 virus in Hong Kong.

**Table 3: Mode of detection of cases tested positive for SARS-CoV-2 virus in Hong Kong**

| <b>Category</b>  | <b>Number of cases (percentage)<br/>since 23 January 2020</b> | <b>Number of cases (percentage)<br/>in the past 4 weeks</b> |
|--|---|---|
| (1) Cases fulfilling the reporting criteria of COVID-19                                      | 336 (0.2%)  | 0 (0.0%)  |
| (2) Enhanced laboratory surveillance in public hospitals                                     | 884 (0.4%)  | 146 (0.1%)  |
| (3) Enhanced surveillance at Accident and Emergency Departments / General Outpatient Clinics | 6202 (3.0%)   | 3540 (1.8%)   |
| (4) Diagnosis / Enhanced surveillance in private hospitals and clinics                       | 2015 (1.0%)   | 628 (0.3%)  |
| (5) Medical surveillance / contact tracing by Centre for Health Protection                   | 5932 (2.9%)   | 783 (0.4%)  |
| (6) Enhanced surveillance for asymptomatic inbound travelers                                 | 2133 (1.0%)   | 114 (0.1%)  |
| (7) Enhanced surveillance for persons with higher risk of exposure                           | 57 (0.0%)   | 30 (0.0%)   |
| (8) Private testing for the targeted groups*   | 98 (0.0%)   | 0 (0.0%)  |
| (9) Universal Community Testing Programme  | 32 (0.0%)   | 0 (0.0%)  |
| (10) Community testing centre^   | 5653 (2.7%)   | 3924 (2.0%)   |
| (11) Others  | 11 (0.0%)   | 0 (0.0%)  |
| (12) Pending   | 182417 (88.7%)  | 182410 (95.2%)  |
| <b>Total</b>   | <b>205770 (100.0%)</b>  | <b>191575 (100.0%)</b>                                      |

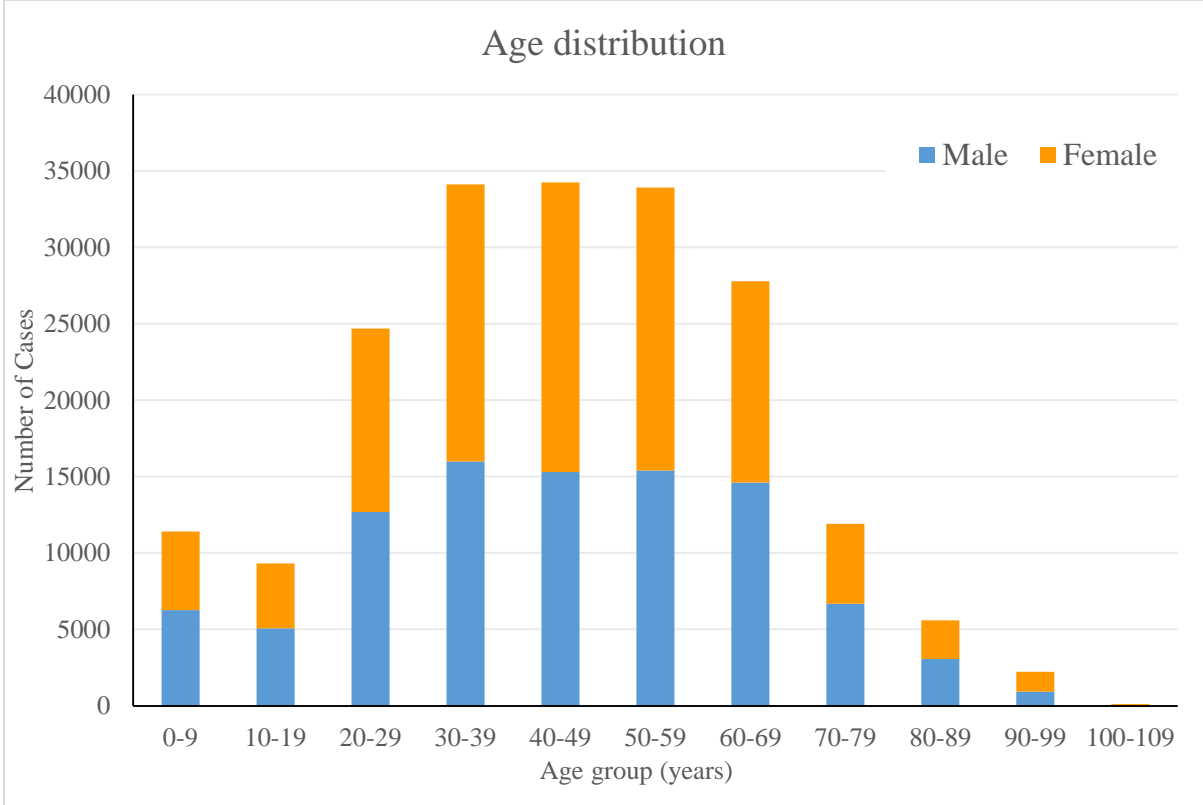

Note: Re-positive cases are excluded in Table 3.

\* <https://www.info.gov.hk/gia/general/202009/19/P2020091900029.htm>

^ Including 1 case detected by temporary testing centre

Figure 5 shows the age and gender distribution of the cases. The ages ranged from 12 days to 116 years (median: 45 years). Male to Female ratio 1:1.

**Figure 5: Age distribution of cases tested positive for SARS-CoV-2 virus in Hong Kong**

Note: Re-positive cases and cases pending investigation are excluded in Figure 5.
