

## **Latest situation of COVID-19 (as of 17 May 2022)**

The Centre for Health Protection (CHP) of the Department of Health (DH) today (17 May) announced the latest epidemic situation of COVID-19. As of 17 May 2022, the CHP was investigating 166 additional cases tested positive for the SARS-CoV-2 virus by nucleic acid tests in the past 24 hours. Separately, 162 additional positive cases through rapid antigen tests (RAT) were reported. Hong Kong has recorded a total of 760681 and 448387 cases tested positive by nucleic acid tests and RAT respectively for the SARS-CoV-2 virus so far.

Since the 5<sup>th</sup> wave (31 December 2021), 748050 cases and 448387 cases were tested positive by nucleic acid test and rapid antigen test respectively.

In the recent 7-day period from 11 to 17 May 2022, an average of 125.7 cases by nucleic acid tests were reported per day, as compared with 126.9 cases per day reported in the previous 7-day period from 4 to 10 May 2022 (Figure 1(i)).

Note:

1. Re-positive cases are excluded in Figure 1(i).
2. As announced by the Government on 15 February 2022 ([https://www.news.gov.hk/eng/2022/02/20220215/20220215\\_172336\\_940.html?type=category&name=covid19&tl=t](https://www.news.gov.hk/eng/2022/02/20220215/20220215_172336_940.html?type=category&name=covid19&tl=t)) and 25 February 2022 (<https://www.info.gov.hk/gia/general/202202/25/P2022022500816.htm>), positive cases detected by the Hospital Authority and testing contractors are now directly deemed as confirmed cases.

As of 17 May 2022, a total of 448387 cases have been recorded through the "Declaration System for individuals tested positive for COVID-19 using Rapid Antigen Test".
