

Latest situation of COVID-19 (as of 5 April 2022)

The Centre for Health Protection (CHP) of the Department of Health (DH) today (5 April) announced the latest epidemic situation of COVID-19. As of 5 April 2022, the CHP was investigating 1658 additional cases tested positive for the SARS-CoV-2 virus by nucleic acid tests in the past 24 hours. Separately, 1596 additional positive cases through rapid antigen tests (RAT) were reported. Hong Kong has recorded a total of 745253 and 432561 cases tested positive by nucleic acid tests and RAT respectively for the SARS-CoV-2 virus so far.

Since the 5th wave (31 December 2021), 732622 cases and 432561 cases were tested positive by nucleic acid test and rapid antigen test respectively.

In the recent 7-day period from 30 March to 5 April 2022, an average of 2280.1 cases were reported per day, as compared with 4055.7 cases per day reported in the previous 7-day period from 23 to 29 March 2022 (Figure 1(i)).

Note:

1. Re-positive cases are excluded in Figure 1(i).
2. As announced by the Government on 15 February 2022 (https://www.news.gov.hk/eng/2022/02/20220215/20220215_172336_940.html?type=category&name=covid19&tl=t) and 25 February 2022 (<https://www.info.gov.hk/gia/general/202202/25/P2022022500816.htm>), positive cases detected by the Hospital Authority and testing contractors are now directly deemed as confirmed cases.

As of 5 April 2022, a total of 432561 cases have been recorded through the "Declaration System for individuals tested positive for COVID-19 using Rapid Antigen Test".

Note:

1. The classification and case status may be subject to changes when there is new information available.
2. Specimen collection dates are used for cases without information of onset dates.
3. Cases still under investigation are excluded in Figure 2.
