

Latest situation of COVID-19 (as of 12 August 2022)

The Centre for Health Protection (CHP) of the Department of Health (DH) today (12 August) announced the latest epidemic situation of COVID-19. As of 0.00am, 12 August 2022, the CHP was investigating 4222 additional locally acquired cases tested positive for the SARS-CoV-2 virus, including 1263 cases tested positive by nucleic acid tests and verified 2959 cases tested positive by rapid antigen tests (RATs) in the past 24 hours^{Note 1}. Separately, 217 additional imported cases were reported, including 193 cases tested positive by nucleic acid tests and 24 cases tested positive by RATs. So far, Hong Kong has recorded a total of 840746 and 565989 cases tested positive by nucleic acid tests and RATs respectively for the SARS-CoV-2 virus.

Since the 5th wave (31 December 2021), 828115 cases and 565989 cases were tested positive by nucleic acid tests and rapid antigen tests respectively.

In the recent 7-day period from 6 to 12 August 2022, an average of 1642.1 cases by nucleic acid tests were reported per day, as compared with 1753.4 cases per day reported in the previous 7-day period from 30 July to 5 August 2022 (Figure 1(i)).

Figure 1(i): Daily number and 7-day moving average of cases tested positive for SARS-CoV-2 virus by nucleic acid tests in 2022^{Note 2}

Note 1:

Starting from 7 June 2022, only cases reported via the "Declaration System for individuals tested positive for COVID-19 using Rapid Antigen Test" which had been verified with positive nucleic acid test results will be announced. These include RAT positive cases reported in the past few days.

Note 2:

- Re-positive cases are excluded in Figure 1(i).
- As announced by the Government on 15 February 2022 (https://www.news.gov.hk/eng/2022/02/20220215/20220215_172336_940.html?type=category&name=covid19&title=) and 25 February 2022 (<https://www.info.gov.hk/gia/general/202202/25/P2022022500816.htm>), positive cases detected by the Hospital Authority and testing contractors are now directly deemed as confirmed cases.
