

## **Latest situation of COVID-19 (as of 15 May 2022)**

The Centre for Health Protection (CHP) of the Department of Health (DH) today (15 May) announced the latest epidemic situation of COVID-19. As of 15 May 2022, the CHP was investigating 113 additional cases tested positive for the SARS-CoV-2 virus by nucleic acid tests in the past 24 hours. Separately, 146 additional positive cases through rapid antigen tests (RAT) were reported. Hong Kong has recorded a total of 760402 and 448104 cases tested positive by nucleic acid tests and RAT respectively for the SARS-CoV-2 virus so far.

Since the 5<sup>th</sup> wave (31 December 2021), 747771 cases and 448104 cases were tested positive by nucleic acid test and rapid antigen test respectively.

In the recent 7-day period from 9 to 15 May 2022, an average of 122.7 cases by nucleic acid tests were reported per day, as compared with 126.0 cases per day reported in the previous 7-day period from 2 to 8 May 2022 (Figure 1(i)).

Note:

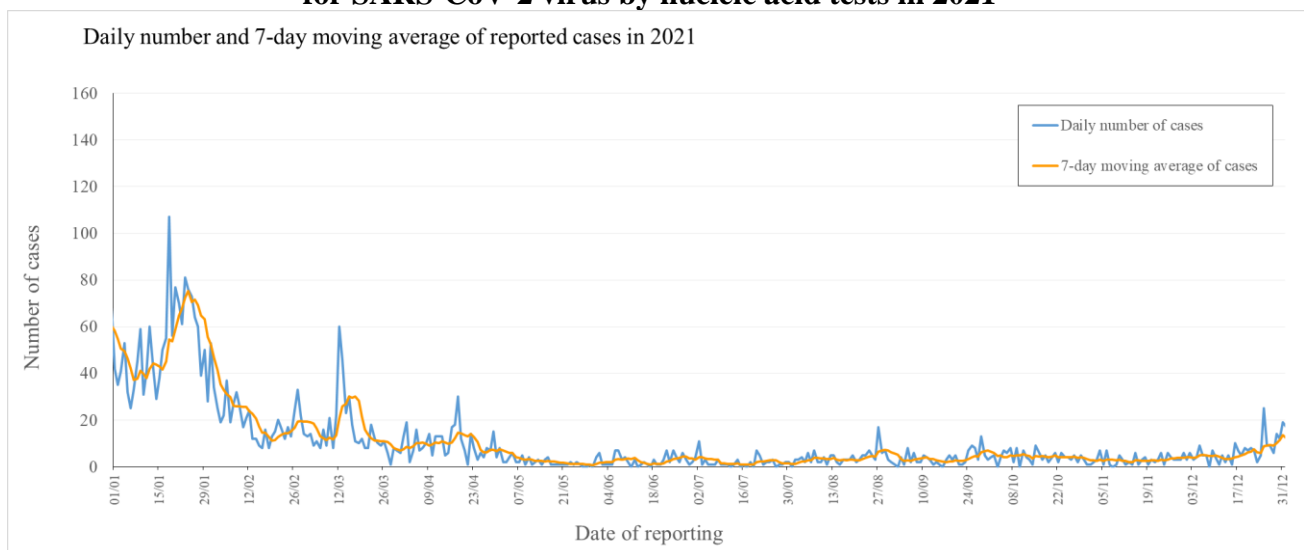

1. Re-positive cases are excluded in Figure 1(i).
2. As announced by the Government on 15 February 2022 ([https://www.news.gov.hk/eng/2022/02/20220215/20220215\\_172336\\_940.html?type=category&name=covid19&title=](https://www.news.gov.hk/eng/2022/02/20220215/20220215_172336_940.html?type=category&name=covid19&title=)) and 25 February 2022 (<https://www.info.gov.hk/gia/general/202202/25/P2022022500816.htm>), positive cases detected by the Hospital Authority and testing contractors are now directly deemed as confirmed cases.

As of 15 May 2022, a total of 448104 cases have been recorded through the "Declaration System for individuals tested positive for COVID-19 using Rapid Antigen Test".
