

Latest situation of COVID-19 (as of 16 June 2022)

The Centre for Health Protection (CHP) of the Department of Health (DH) today (16 June) announced the latest epidemic situation of COVID-19. As of 16 June 2022, the CHP was investigating 486 additional cases tested positive for the SARS-CoV-2 virus by nucleic acid tests in the past 24 hours. Separately, 693 positive cases through rapid antigen tests (RAT) were reported^{Note 1}. Hong Kong has recorded a total of 766805 and 456182 cases tested positive by nucleic acid tests and RAT respectively for the SARS-CoV-2 virus so far.

Since the 5th wave (31 December 2021), 754174 cases and 456182 cases were tested positive by nucleic acid test and rapid antigen test respectively.

In the recent 7-day period from 10 to 16 June 2022, an average of 393.4 cases by nucleic acid tests were reported per day, as compared with 220.3 cases per day reported in the previous 7-day period from 3 to 9 June 2022 (Figure 1(i)).

Figure 1(i): Daily number and 7-day moving average of cases tested positive for SARS-CoV-2 virus by nucleic acid tests in 2022 ^{Note 2}

Note 1:

Starting from 7 June 2022, only cases reported via the "Declaration System for individuals tested positive for COVID-19 using Rapid Antigen Test" which had been verified with positive nucleic acid test results will be announced. These include RAT positive cases reported in the past few days.

Note 2:

- Re-positive cases are excluded in Figure 1(i).
- As announced by the Government on 15 February 2022 (https://www.news.gov.hk/eng/2022/02/20220215/20220215_172336_940.html?type=category&name=covid19&title=) and 25 February 2022 (<https://www.info.gov.hk/gia/general/202202/25/P2022022500816.htm>), positive cases detected by the Hospital Authority and testing contractors are now directly deemed as confirmed cases.
